Experience

Dinotik — Flutter Developer (Remote)

June 2025 – Present

- Implemented clean code principles to improve maintainability and scalability.
- Integrated deep linking for seamless in-app navigation and user experience.
- Added data caching mechanisms to enhance performance and reduce API calls.
- Utilized debugging methods and loggers to trace and resolve runtime issues efficiently

Na3ml Hackathon — Intern Flutter Developer (Remote)

Jul 2023 - Sep 2023

Project: Deraya - Teaching Programming to Children.

- Accelerated user login efficiency by integrating Google Sign-in, reducing login time by 20%, which led to user satisfaction.
- Engineered the application's state management using the BLoC.
- Enhanced UI by adapting UI elements to multiple screen sizes leading to a 25% increase in app engagement.
- Optimized data handling by storing user information locally on the device, increased offline accessibility.

Projects

WHATS APP Firebase, Riverpod as State management

- Implemented phone number authentication and user profiles, including contact lists and profile images.
- Built real-time 1-on-1 chat with support for text, images, GIFs, audio recording, video, and emojis.
- Enhanced messaging functionality, increasing user engagement by 30% with real-time status indicators, seen tracking, and seamless auto-scroll for new messages.

ENSURE APP Supabase, BLoC as state management

- Created a full-featured social media app with Flutter, leveraging clean architecture.
- Integrated Supabase for authentication, real-time chat, and backend services.
- Designed and implemented features like user profiles, a follow system, post interactions, and search functionality.
- Built a scalable and responsive UI with support for dark mode and media uploads.
- Ensured seamless real-time experiences for messaging and updates using subscriptions.

Education

Bachelor of Computer Science

Misr Higher institute of commerce and computers

Sep 2020 - Jun 2024

Technical Skills

Languages: Proficient in Dart, Intermediate in C++

Flutter: State Management (Bloc, Cubit, Riverpod), Google Maps, Payments, Notifications, Shared Preferences, Hive and SQflite for local storage, RESTful APIs with Dio and Http packages, multi-language support, Lottie animations, Async programming.

Firebase: Authentication, Firestore, Push Notifications, Realtime Database.

Development Tools: Version Control: Git, GitHub

CI/CD: Experience with continuous integration and deployment (e.g., GitHub Actions, Fastlane)

Additional Skills: OOP, SOLID principles, Data Structures & Algorithms, JSON, Debugging, Clean Architecture.
