PROFESSIONAL SUMMARY

Mid-level Flutter developer with 1.5+ years of professional experience shipping production Android and iOS apps in Dart. Strong in BLoC/Cubit state management, clean, layered architecture, REST and Socket.IO integration, offline-first storage, automated testing, Arabic/English localization with RTL, and CI/CD delivery through GitHub Actions and Fastlane. B.Sc. in Computer Science.

PROFESSIONAL EXPERIENCE

Mid-Level Flutter Developer

Oct 2026 – Present

Thaheen

Thaheen — learning app for university students (Android & iOS) — Google Play

- Rebuilding the student app from scratch in Flutter on a layered architecture (core, data, design system, features) enforced by a CI rule, with a generated OpenAPI client and a fake for every repository.
- Shipped DRM-protected course video (VdoCipher, Widevine/FairPlay), quizzes with answer review, flashcards, notes, certificates and in-app PDF viewing.
- Built Let's Focus, a study timer with ambient audio, Android and iOS home-screen widgets and offline sync on a Drift (SQLite) database.
- Added App Store in-app purchases with StoreKit 2, FCM push, Crashlytics and Analytics; 600+ test files with goldens and GitHub Actions releases to Google Play and TestFlight.

Flutter Developer

Jun 2025 – Oct 2026

Dinotik · Remote

Oplla — equipment rental and crew booking marketplace for UAE film and TV production — dinotik.com/en/work/oplla

- Built search, filtering, cart and booking flows with rescheduling and cancellation across a two-app Melos monorepo that shares one core package for networking, auth, theme and analytics.
- Implemented real-time chat over Socket.IO with typing indicators, read receipts, message edit and delete, and reconnect catch-up.
- Integrated Firebase phone OTP and JWT authentication with a token-refresh interceptor that queues concurrent requests on 401.
- Configured GitHub Actions CI gates for analysis, formatting, tests and translation drift, plus Fastlane deploys to TestFlight and Firebase App Distribution.

JobSite Inspector — field inspection app replacing paper-based fire-safety audits — dinotik.com/en/work/fire-inspection

- Developed dynamic inspection checklists for fire alarms, extinguishers and wet systems with photo capture, notes, digital signatures and QR/barcode device scanning.
- Made inspections offline-safe by auto-saving every checklist answer to a Hive cache and restoring state on reopen.
- Improved scrolling and tab performance using IndexedStack, buildWhen, RepaintBoundary and cached network images.

Flutter Developer Intern

Jul 2023 – Sep 2023

Na3ml Hackathon · Remote

- Engineered state management with BLoC and integrated Google Sign-In for Deraya, an app that teaches programming to children.
- Built responsive layouts for multiple screen sizes and local storage for offline access.

PROJECTS

Halal — Islamic companion app

Flutter · Cubit · Clean Architecture · Kotlin · GetIt

On-device prayer times from GPS with adhan alarms scheduled natively in Kotlin; Quran reader, azkar reminders, tasbih, qibla compass and Hijri calendar, covered by unit tests.

Ensure — social media app — github.com/mostafaramadanhamed/ensure

Flutter · Supabase · BLoC · Clean Architecture

Supabase authentication, real-time chat and live feed updates through subscriptions, follow system, post interactions, search, media uploads and dark mode.

EDUCATION

B.Sc. in Computer Science · Misr Higher Institute of Commerce and Computers — Sep 2020 – Jun 2024

TECHNICAL SKILLS

Languages	Dart, Kotlin, C++
Flutter	BLoC, Cubit, Riverpod, Provider, GetIt, GoRouter, Clean Architecture, SOLID, Melos monorepo, Localization (i18n, RTL), Deep Linking, Google Maps, Payments (Stripe, PayPal), Lottie, Performance Optimization
Data & Networking	REST APIs, Dio, HTTP, JSON, Socket.IO, WebSockets, JWT, OpenAPI codegen, Hive, Drift, SQflite, Shared Preferences
Backend	Firebase (Authentication, Firestore, Realtime Database, FCM, Remote Config, Analytics, Crashlytics), Supabase
Tools & Delivery	Git, GitHub, GitHub Actions, Fastlane, TestFlight, Firebase App Distribution, Unit, Widget & Golden Testing, Postman, Claude Code, GitHub Copilot
